Child Aural/Audiologic Rehabilitation

Child Aural/Audiologic Rehabilitation. Often with children, aural rehabilitation services would more appropriately be called "habilitative" rather than "rehabilitative." "Rehabilitation" focuses on restoring a skill that is lost. In children, a skill may not be there in the first place, so it has to be taught -- hence, the services would be ...

Aural Rehab with a Hearing Impaired Teenager Patricia B ...

What aural rehab recommendations would you suggest for a 14 year old whose audiogram revealed a low frequency sensorineural hearing loss in the left ear with excellent speech discrimination ability, and a severe sensorineural hearing loss in the right ear? She could not understand speech in the right ear at any level. Impedance audiometry revealed type A curves, but absent acoustic reflexes.

Aural Rehabilitation

Aural rehabilitation, often referred to as aural rehab or A.R., encompasses a wide set of practices aimed at optimizing a person's ability to participate in activities that have been limited as a result of hearing loss.. Some hearing healthcare professionals use an aural rehabilitation model in their work with clients. Such an approach to hearing health care often begins with a thorough ...

Adult Aural Rehabilitation: What Is It and Does It Work?

Adult aural rehabilitation is here defined holistically as the reduction of hearing-loss-induced deficits of function, activity, participation, and quality of life through a combination of sensory management, instruction, perceptual training, and counseling.
