CAP

Climate change, transboundary pollution, biodiversity loss, and the emerging field of environmental human rights make comparative environmental law especially compelling. This coursebook provides a comparative look at environmental and natural resource laws governing water, waste, biological diversity (wildlife and habitat), and environmental assessment.

Comparative Environmental and Natural Resources Law

Comparative Environmental and Natural Resources Law is suitable as a text for law school classes and seminars as well as graduate courses in environmental and international studies. Students need not have taken a domestic environmental law course prior to studying this subject.

Comparative Environmental Law

Students in this course will learn how laws are used to help protect natural resources and the environment. The course will begin with a general survey of basic legal concepts, practical theories and judicial systems that are commonly used around the world today. After laying a strong legal foundation, we will explore specific environmental ...
